

## Taking Plumeria Cuttings From Large Trees Or To Reduce Size

**A. Cut branches approximately 4 inches from the main trunk with a clean, sharp knife.**

**B. Let newly cut cuttings cure for 2 weeks, then pot up as in this link: <http://azplumeria.org/potting2.htm> or your usual way to root cuttings.**

**C. The main plant will start to grow new branches from the cut branches.**
